DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21 and 34, drawn to a method and storage medium for selecting engine modes, classified in class 123, subclass 198F.
- II. Claims 22-27, drawn to an engine with an electromechanical valve, classified in class 123, subclass 90.11.
- III. Claims 28-33, drawn to a method of operating a two intake valve engine, classified in class 123, subclass 432.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II have separate utility such as use alone in engines without mode selection or multiple intake valves. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
